No. P. 8/B of 1930.

Office of the Surgeon-General with the Government of Bombay :

Poona, 14th June 1930.

From

Major-General W. H. C. FORSTER, I.M.S.,
Surgeon General with the Government of Bombay, Poona;

To

The SECRETARY to GOVERNMENT,
General Department, Bombay.

Subject.—Annual Report on Mental Hospitals.

Sir,

I have the honour to submit the Annual Report on Mental Hospitals in the Bombay Presidency for the year 1929.

2. *Buildings.*—The buildings are in good state of repair. At Yeravda a new block for better class male patients was completed and the construction of two separate Wards for Parsi Female patients is in progress. Some minor additions and alterations were also carried out during the year. At Hyderabad similar improvements were made and funds have been provided for carrying out repairs to the Civil Yard to make it suitable for habitation.

3. *Water supply.*—The supply has been good and sufficient at all the Mental Hospitals.

Statement No. I.

Population.

4. The total population of the Mental Hospitals during the year under review was 2,428 as compared with 2,298 in 1928. In this connection it may be noted that in the last two years the rate of increase of the population has been approximately 150 per annum. Admissions including re-admissions numbered 535 males and 193 females during the year against 561 males and 163 females respectively in 1928. The increase was shared by all the Mental Hospitals. The daily average strength was 1756·0 as compared with 1657·7 in the previous year.

Discharges and cures.

5. During the year under report 272 patients were discharged cured, 89 improved, 38 not improved, and 57 were discharged otherwise.

Sickness and Mortality.

6. The daily average number of sick treated in hospital was 133·9 against 89·4 in 1928. The percentage of sickness to the daily average strength was 7·6 against 5·4 in 1928. The health of the patients was generally good during the year.

7. There were 204 deaths against 153 in 1928. The ratio of deaths per cent. of the daily average strength was 11·6 as compared with 9·2 in the preceding year. The increase in the number of deaths was due mainly to the increased mortality at the Naupada and Hyderabad Mental Hospitals. Out of the 87 deaths at Naupada 23 were caused by Tuberculosis and Phthisis alone, 18 by bowel complaints and 7 by malaria. At Hyderabad of the 30 deaths 6 were due to Pneumonia and 4 each to diseases of the Heart, Bright's Disease, T. B. of intestines and Senile debility. The increased mortality at the Mental Hospital, Naupada, was due to the admission of a large number of cases in a moribund condition and the fading away of old chronic cases. The increase in deaths from Phthisis was supplied from the new admissions of whom an exceptional number were in a very weak and debilitated state on admission. The high mortality at the Mental Hospital, Hyderabad, was due to the vitiating climatic conditions during the latter part of the year brought on by heavy rains and floods. Patients with deteriorated health and low vitality were unable to withstand the sudden variations in temperature and out of the 30 deaths at the hospital 24 occurred during the last four months of the year. The sub-joined table gives the ratio of deaths to the daily average strength at the several Mental Hospitals :—

Mental Hospitals		Males	Females	Total
Naupada, Thana		25·0	28·7	25·9
Ratnagiri		5·7	1·1	6·8
Central Mental Hospital, Yeravda ..	E.	2·1	8·0	4·4
	I.	8·1	12·9	9·5
Dharwar		4·7	2·3	7·0
Ahmedabad		2·6	4·7	3·1
Hyderabad		15·2	16·1	15·3
Total ..		11·0	13·1	11·6

8. The chief causes of death at the various Mental Hospitals during the year were Tuberculosis including Phthisis (33), Pneumonia (14), Dysentry (12), Senile debility (11), Heart Disease (8), Enterites (8), Malaria (7), Bright's Disease (6) and Diarrhœa (4).

STATEMENT No. I-A.

Cases admitted for observation.

9. During the year 316 cases were admitted to the various Mental Hospitals for observation. Of these 251 were certified and admitted in to the Mental Hospitals and 55 were released as uncertifiable. In

the past, few such cases were admitted and the large number of admissions during the year is attributable to the recent orders under which cases of alleged insanity at places where there are Mental Hospitals are kept under observation at the Mental Hospitals instead of at the Civil Hospitals.

STATEMENT No. II.

Criminal Insanes.

10. The total number of criminal insanes confined in the Mental Hospitals during 1929 was 164 (155 males and 9 females) with a daily average strength of 109·2.

STATEMENT No. III.

Religion.

11. Of the 728 cases admitted during the year 39 were Europeans and Eurasians, 71 Indian Christians, 430 Hindus, 141 Mahomedans and 47 belonged to other castes.

STATEMENT No. IV.

Previous occupations of the insanes admitted.

12. Domestic servants 113 including house-wives furnished the largest number of admissions followed by clerks and labourers (45) each, students (32), Agriculturists (27), Merchants and Traders (25), Mendicants (23) and 187 other known occupation. In 79 cases the previous occupation could not be ascertained and 152 had no occupation.

STATEMENT No. V.

Ages of insanes admitted.

13. Sixty-six insanes were under 20 years of age on admission, 479 between 20 and 40, 163 between 40 and 60 and 20 were upwards of 60 years.

STATEMENT No. VI.

Types of insanity.

14. The principal types of insanity treated were Mania 742 against 694 in 1928, Melancholia 449 against 460, Delusional insanity 91 against 75, Dementia 356 against 315, insanity due to Cannabis Indica or its preparations 149 against 153 and Idiocy 48 against 49.

STATEMENT No. VII.

Ætiological factors and associated conditions in the insanes admitted.

15. The principal predisposing and exciting causes were mental stress 75 against 88 in 1928, mental instability 111 against 125 and toxic diseases 29 against 42. Owing to defective history the causes of insanity could not be ascertained in 85 cases as compared with 360 in the previous year.

Statement VIII.

Cash accounts.

16. The receipts from paying patients amounted to Rs. 1,29,511 in 1929 against Rs. 1,16,116 in 1928. The value of stores received from the manufacturing department less cost of raw materials was Rs. 16,007 against Rs. 19,312 in the previous year. The total receipts under the two heads amounted to Rs. 1,45,518 as compared with Rs. 1,35,428 in 1928—an increase of Rs. 10,090.

17. The total expenditure in 1929 amounted to Rs. 8,42,824 as compared with Rs. 8,06,159. The increase was due to the larger amount of changes on account of works done by the Public Works Department. Deducting the receipts the net expenditure was Rs. 5,34,446 against Rs. 5,20,945.

18. The following table shows the cost per annum per head of the daily average strength in the several institutions during the past two years :—

Institutions	1928	1929
	Rs.	Rs.
Naupada, Thana	347	348
Ratnagiri	233	210
Central Mental Hospital, Yeravda	616	606
Dharwar	255	230
Ahmedabad	259	249
Hyderabad	217	240

19. *Employment and amusements.*—The employment of patients such as gardening, weaving and helping in the domestic duties connected with the Mental Hospitals continues the same as in previous years. Rs. 2,516 were expended during the year for the amusements and recreation of the insanes against Rs. 3,337 spent in 1928.

Visitors.

20. The Official visitors were regular in their attendance at all the Mental Hospitals.

21. A summarised report of the Central Mental Hospital, Yeravda, is published as an appendix.

I have the honour to be,

Sir,

Your most obedient servant,

W. H. C. FORSTER,

Major-General, I.M.S.,

Surgeon General with the Government of Bombay.

APPENDIX.

ANNUAL REPORT OF THE CENTRAL HOSPITAL FOR MENTAL DISEASES, YERAVDA, FOR THE YEAR 1929.

Whilst professional opinion and that of the general public in Western Countries is strongly in favour of the treatment of certain types of insanity as out-patients or in-patients in special wards of General Hospitals or as patients in Mental Hospitals without certification, it is unfortunate here that cases are brought for admission who have been ill for periods ranging from one year to four or more particularly amongst the more educated and effluent classes. This is no doubt due to strong prejudices and to the great influence of women in the affairs of a family. Apart from this however much is due to lack of propaganda and of the preventive spirit amongst general practitioners. It would serve no useful purpose to enumerate the many reasons for this apathy.

The year opened with 658 patients; there were 266 admissions (179 males and 87 females) as compared with 281 in 1928 and 205 in 1927, the highest number present on one day being 720 and the total number treated being 925 as compared with 903 for 1928 and 809 for 1927.

During the year 82 patients were discharged as recovered, 35 as improved, 23 as not improved, 2 escaped and 44 were transferred to the United Kingdom and other Mental Hospitals making the total number disposed of 186 as compared with 182 in 1928.

There were 57 deaths leaving a total of 694 on the 31st December 1929. The causes of deaths were as shown below:—

Bronchitis (Gangrenous)	1	Malarial Cachexia	1
Cellulitis	1	Malaria *plus* Ascaris Lumbricoides	1
Cerebral Hæmorrhage	1	Acute Nephritis	1
Cerebral Atrophy	7	Chronic Nephritis	1
Disseminated Selerosis	1	Pneumonia	8
Dementia Præcox (Acute)	1	Pulmonary Tuberculosis	4
Emphysema (Asthmatic)	1	Pernicious Anæmia	1
Enteritis	8	Septicæmia	2
Exhaustion	5	Puerperal Septicæmia	1
Status Epilepticus	1	Snility	5
Encephalitic Lethargica	2	V. D. H.	1
Acute Gastritis	1		
Cerebral Malaria	1	Total	57

Of these it should be noted that one was 69 years of age and another 80 years of age, both females, and that five patients were admitted so late that they died within periods of 1, 5, 8, 16 and 23 days of their admission and that one of these died of Cerebral Hæmorrhage as a result of a head injury sustained prior to admission.

Additional accommodation was provided during the year by breaking down walls in both the male and female infirmaries thus turning several

small wards into fewer larger ones and by occupying a ward for 5 better class male patients which had been built during the previous year.

Hospital outturn.—The value of the garden produce supplied to the Hospital as well as to the public in 1929 was Rs. 11,234-9-0 as compared with Rs. 9,975-0-11 in 1928.

It is a matter for congratulation that this institution was awarded 31 prizes (16 first, 8 seconds and 7 thirds) in the Agri-Horticultural Show held last September.

Major and Minor Works.

(1) Major works completed—

Constructing a new block for better class male patients—Rs. 10,968-4-0.

(2) Original Major Works in progress—

(*a*) Constructing two separate wards for Parsi female patients—Rs. 65,478-11-0.

(*b*) Constructing three blocks of servants' quarters—Rs. 28,876-15-0.

(3) Major Works (Current Repairs Works)—
Current Repair Works (Proper)—Rs. 9,138-5-1.

(4) Completed Minor Works—

(*a*) Constructing a twelve-seated latrine for servants (6 for males and 6 for females)—Rs. 3,791-5-0.

(*b*) Additions and alterations to the Infirmary Blocks Nos. 27, 31, and 91—Rs. 626-8-6.

(*c*) Improvements to the quarters for Sub-Assistant Surgeon's block No. 93—Rs. 124-14-0.

(5) Current Repairs Minor Works—
Current Repairs (Residential)—Rs. 2,360-15-6.

During the year a Durbanian Range costing about Rs. 1,000 was provided for the Parsi Kitchen through the energies of Mr. R. N. Vatchaghandy, the Editor and Proprietor of *Sanj Vartaman* and excellent paintings in teak wood frames of His Majesty the King and Her Majesty the Queen were presented by Mr. A. C. Patel for the Recreation Hall.

The usual games and picnics were much enjoyed as well as the weekly concerts and the weekly cinema performances for which our thanks are due to Mr. Mody, the Manager, and Proprietors of the West End Cinema.

The amount spent from the special grant this year was Rs. 913-15-8 as compared with Rs. 2,079-1-3 in 1928.

(Signed) E. C. A. SMITH,
Major, I.M.S.,
Superintendent, Central Hospital for Mental Diseases, Yeravda.
